NIKESH KUMAR

AI ENGINEER

Patna, Bihar, India | nikeshkumarwork@gmail.com | +91 7992401103

Portfolio | LinkedIn | GitHub

SUMMARY

AI Engineer specializing in LLM-powered applications, RAG pipelines, and AI Agents using LangChain, LangGraph and Python. Founder of Innera, an ed-tech platform for CBSE/NCERT and competitive exam students, now integrating AI-driven personalization. Builds and ships production-style AI systems end-to-end, from data pipelines to deployed APIs.

SKILLS

AI & Generative AI: LangChain, LangGraph, RAG, AI Agents, Prompt Engineering, Structured Output

ML / Backend for AI: Python, FastAPI, SQL, Vector Embeddings, Firebase, REST APIs

Tools & Automation: n8n, Docker, Git & GitHub, React / React Native, TypeScript

EXPERIENCE

AI Automation Developer at Business Automation (Freelance) *2026*

- Built and debugged n8n automation workflows end-to-end: a Gmail sender triggered by Google Sheets rows, Zoom registration auto-emails via webhook, and Gmail attachment delivery through Google Drive.
- Deployed workflows via Docker for persistent, always-on automation.

AI Engineering, Self-Directed Learning at Independent Study *2026*

- Completed a structured LangChain learning path: LLMs, Chat Models (OpenAI, Gemini, HuggingFace), embeddings, document similarity, and structured output using Pydantic and TypedDict.
- Progressed into LangGraph, applying multi-agent systems, ReAct loops and checkpointing across five independent AI agent projects.

Founder | AI Engineer at Innera *2026 – Present*

- Building an ed-tech platform for CBSE/NCERT (Classes 6–12) and competitive exam students (JEE, SSC, Bank, Railway, UGC NET).
- Designed a feature-based modular architecture and a fully Firestore-driven content system, so classes, subjects and exam tracks scale without code changes.
- Actively integrating AI-driven personalization into the learning experience.

PROJECTS

Innera, AI-Powered Ed-Tech Platform | GitHub | Live Demo

- React Native + Firebase mobile app with a Firestore-driven syllabus system and AI-driven personalized learning for school and competitive-exam students.

AI Data Analyst Agent (LangGraph) | GitHub | Live Demo

- A self-correcting LangGraph agent that writes and executes pandas code to answer natural-language questions about uploaded data, with structured (Pydantic) outputs and automatic retry on execution errors.

Interview Prep (LangGraph) | GitHub | Live Demo

- A 3-agent mock interviewer, interviewer, evaluator, and coach agents working together, with question difficulty that adapts round by round based on answer quality.

Reel Generator (LangGraph) | GitHub | Live Demo

- An end-to-end content pipeline that turns a topic into a captioned short-form video: LangGraph-driven script generation, automated voiceover, and video assembly.

AI Job-Match Agent (LangGraph) | GitHub | Live Demo

- A 4-node LangGraph agent (extract resume → extract JD → match & score → suggest) that scores resume-to-job-description fit and generates actionable improvement suggestions, using structured (Pydantic) outputs at every step.

EDUCATION

M.Sc. Mathematics at Durga Soren University — *Ongoing, Expected 2026*

B.Sc. Mathematics at T.M. Bhagalpur University — *2020*

CERTIFICATIONS

AI/ML Prime 2.0, Apna College (by Shradha Khapra), In Progress

ADDITIONAL INFORMATION

- Languages: English, Hindi
- Actively seeking full-time / remote AI Engineer roles, available immediately
- Comfortable working across the full AI product lifecycle: data pipeline → model integration → API → deployment
